

# JOURNAL OF HYDROLOGY AND METEOROLOGY

## CONTENTS

Volume 6 Number 1

August 2009

Janak Lal Nayava, Rabi Singh, Madan Raj Bhatta	1	Impact of Climate, Climate Change and Modern Technology on Wheat Production in Nepal: A Case Study at Bhairahawa
M. Shahjahan Mondal, Yuichi Kouchi and Kenji Okubo	15	Sedimentation and Thermal Stratification During Floods: A Case Study on Hail Haor of North-East Bangladesh
Arun Bhakta Shrestha and Sharad Prasad Joshi	26	Snow Cover and Glacier Change Study in Nepalese Himalaya Using Remote Sensing and Geographic Information System
Madhav Narayan Shrestha	37	Water Rights: A key to sustainable development in Nepal
Suresh Marahatta and Jagat Kumar Bhusal	44	Relating Hydrological Extremes with Area – A Case on Extreme Floods in South Central Nepal
Mandira Shrestha, Bandana Pradhan, Ram Devi Tachamo, Deep Narayan Shah, Subodh Sharma and Otto Moog	49	Water Quality Assessment and Associated Stressing Factors of the Seti River Basin, Pokhara Sub Metropolitan City
Narayan Prasad Chaulagain	58	Climate Change Impacts on Water Resources of Nepal with Reference to the Glaciers in the Langtang Himalayas
Bhola Nath Dhakal	66	Analysis of Channel Geometry and Sediment Transport in Palung and Chitlang Watersheds Using GIS

*This Journal is sponsored by International Hydrological Programme (IHP),  
National Committee, Nepal and UNESCO, Delhi*

Journal of Hydrology and Meteorology is a publication of the Society of Hydrologists and Meteorologists-Nepal (SOHAM-Nepal)

The journal is registered at the District Administration Office, Kathmandu (Reg. No. 88/060/06)

ISSN 1818-2518

Vol. 6 No. 1

Volume 6, Number 1  
August 2009

ISSN 1818-2518

# JOURNAL OF HYDROLOGY AND METEOROLOGY

## AIMS AND SCOPE

Research and studies related to weather, climate and water are vital in understanding the behavior of earth-atmospheric system and its various aspects. It is more so in the Himalayan region where the interaction of weather with its topography is an unique one and which has become a great challenging task to the scientific communities.

With the view of helping to understand the vagaries of the natural phenomena related to hydrology and meteorology, to interact and to disseminate the results, this journal came into its existence. This journal hopes to act as a forum in publishing peer-reviewed papers in the field of meteorology and hydrology and in turn helping to disseminate the results of the studies and research. Though the main focus of the journal is the weather and water related issues in the Himalayan region, it also intends to include relevant areas like climate change, atmospheric and water pollution, floods, droughts, desertification, glaciology and many others.

The understanding of these phenomena will be a step forward in mitigating the harmful effects of high-impact weather and climate events. We hope that this journal will be of some help to the society in addressing these challenges and move ahead in complementing the current scientific and technical development with cross-disciplinary, integrated approach.

Global weather and climate patterns are interdependent and no one nation can be entirely self-sufficient in the provision of all of its meteorological, hydrological and related environmental services. It is the main reason of keeping a broad scope of this journal so as to be an integral part, may be in a smaller way to the global concerted effort in understanding the ever challenging aspects of weather, climate and water.

The authors are solely responsible for their statements and opinions expressed in their contributions published in "Journal of Hydrology and Meteorology". The Editors do not hold themselves responsible for any such statements and opinions expressed by the authors in their papers.

### Price

Nepal : Individual NRs. 150.00, Institution NRs. 250.00  
SAARC Countries: US \$ 5.00  
Other Countries: US \$ 10.00

and should be numbered consecutively in the order to which they are referred. They should accompany the manuscript, but should not be included within the text. All illustrations should be clearly marked on the back with the figure number and the author's name. All figures are to have a caption. Captions should be supplied on a separate sheet.

*Line drawings:* Good quality printouts on white paper produced in black ink are required. All lettering, graph lines and points on graphs should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal. Dye-line prints or photocopies are not suitable for reproduction. Do not use any type of shading on computer-generated illustrations.

*Ordinates:* Label with adequate graduations. Give three intermediate points (normally x2, x3, x5) between the decades on logarithmic scales.

*Photographs:* Original photographs must be supplied. If necessary, a scale should be marked on the photograph. Please note that photocopies of photographs are not acceptable.

**Tables:** Tables should be numbered consecutively and given a suitable caption and each table typed on a separate sheet. Footnotes to tables should be typed below the table and should be referred to by superscript lowercase letters. No vertical rules should be used. Tables should not duplicate results presented elsewhere in the manuscript (e.g. in graphs).

**Acknowledgements:** As brief as possible, in a separate section before the references, not in the text or as footnotes.

**Appendix:** Items of interest only to specialists in the author's field e.g. model formulations. Descriptions of methods, experimental results, etc. Symbol lists may also be included here.

**Sub-Divisions:** Number sections of the paper (and if necessary sub-sections) if there is any substantial cross-referencing within the paper.

**First Submission:** Some papers, particularly modelling studies, may need extra documentation at the refereeing stage. Please include copies of relevant internal reports, papers in press etc

**Revised Manuscript:** Return two copies of the revised manuscript and a disk with the word-processed text. Include a brief note of your response to the referees' comments. Highlight substantial changes on one copy of the manuscript, using a coloured pen. At this point figures should be properly drafted and of publication standard.

### Electronic Submission

Authors should submit an electronic copy of their paper with the final version of the manuscript. The electronic copy should match the hardcopy exactly. Always keep a backup copy of the electronic file for reference and safety.

### SOHAM-NEPAL Membership Fee

Membership Type	Nepali (NRs)	SAARC (US\$ or equiv NRs.)	Non-SAARC (US\$ or equiv NRs.)
General	300	10	20
Life	2000	120	240
Institutional	5000	300	600
Associate	150	5	10

Please write to [soham@info.com.np](mailto:soham@info.com.np) for membership application form.
